The invention set forth in claims 1 and 2 lacks novelty in the light of documents 1 and 2 cited in the international search report. Document 1 sets forth an inkjet recording device having a first spur wheel (8A) provided in such a manner as to come into contact with the gap roller, and a second spur wheel (8B) and third spur wheel (8C) provided in such a manner as to come into contact with the paper discharge roller. Document 2 sets forth a printing device having a plurality of rollers (18a to 18d) provided opposite the lifting roller 17a.

The invention set forth in claims 3 and 4 does not involve an inventive step in the light of documents 1 and 2.
